

6516209780.txt

When a trucker travels into a city, he or she, will not know what station to look to for traffic, weather, etc. xm radio gives this info at known channells. Radio and television stations should have to compete in business as other businesses have to. their future should not be protected through legislation. My Business gets precious little concideration from legislators. leave XM Radio alone.

Thankyou

Robert L. Ford
